

THIS FORM HAS BEEN DEVELOPED TO ASSIST YOU WITH IMPLEMENTING “POINT OF CARE” DIAGNOSIS & TREATMENT CHANGES.

POINT OF CARE REMINDERS

Patient Name

Topic/Diagnosis

CME Sponsor: American Medical Seminars, Inc.

During the presentations, a specific patient of yours may come to mind when a certain topic/condition is covered. When this occurs:

- (1) Write down what action you would like to take when you return home or the next time this patient comes into your office.
- (2) Write your patient's name (or other identifier) in the upper right hand corner, or if a group of patients, simply write in the topic/diagnosis.
- (3) Implement your action by filing in “each” of your patient files to whom this topic relates for their next visit.

We hope these reminders help you to implement your “Point of Care” diagnosis and treatment changes.
